Objective

Seeking full time remote work in Software Engineering

Education

Rochester Institute of Technology **Aug 2020 - May 2025**
B.S. Computer Science

Work Experience

CACI Software/DevOps Engineer (caci.com) **June 2025 – Present**
- A manufacturing company that develops and designs millitary radio technology
- Lead a small team to continue to improve and automate the testing of millitary radios
- Designed and assembled new testing rack with radio testing equipment to improve testing throughput
- Uses Python, PostgreSQL, Jira, Jenkins, Data Processing, User Interface Design, Agile, Git, Hardware

CACI Software Engineering Intern (caci.com) **May 2024 – Jan 2025**
- Full stack development within a self-led team designing and implementing an auto testing program
- Processed large quantities of data to establish trends and baselines for testing
- Used Python, Jenkins, Testing, Scripting, Data Processing, User Interface Design, Git, Hardware

VisualDx Software Engineering Intern (Visualdx.com) **Jan 2022 – Aug 2022**
- A medical diagnostic tool that utilizes image recognition to assist medical professionals
- Full stack agile development working on updating and developing internal tools for medical librarians
- Used React, JavaScript, Kotlin, Tailwind, SQL, Component Libraries, Jenkins, Unit Testing, Git

Plea Justice Software Engineer Intern (PleaJustice.org) **May 2021– Sept 2021**
- An educational web service aimed at attorneys to teach their clients about the plea-bargaining process
- Used JavaScript, Vue, NodeJS, MongoDB

Projects

Perfect Pantry (github/PerfectPantry)
- Active full stack project to create, save, view, and explore recipes and cooking
- Uses Kotlin, Sping, PostgreSQL,

Portfolio Site (github/evanfp582.github.io) (https://evanfp582.github.io/)
- An ever expanding site to showcase myself, dev logs, and all of my CS projects with interactive demos!
- Uses React, JavaScript, MUI components, CSS, HTML, Themes, Website Deploying

Image to JSON (github/image2JSON)
- Hackathon team project to turn images into customizable and configurable JSON objects
- Uses Python, Image Recognition, JSON, OCRs

Skills

Python, Kotlin, JavaScript, React, Git, Java, Spring, Angular, MongoDB, PostgreSQL, CSS, HTML, UI Design, Android, AWS, AI, C, Unit Testing

Organizations

Suicide Prevention Charity 5k **Jan 2019 – July 2019**
- Curator of race, manager of 100+ runners and 10+ volunteers.
- Donated $2900 to the American Foundation for Suicide Prevention

Computer Science House **Aug 2020 – May 2025**
- Member of a group environment centered around a passion for technology and learning from peers

RIT Varsity Student Athlete **Aug 2020 – May 2025**
- Member of the RIT Cross Country, Indoor Track, and Track and Field Teams
